

Unisystem sp. z o.o. is operating in the electronics market since 1995. We specialized in providing displays, touch panels, industrial computers, software & hardware design, and assembly of the components and customized solutions during this time.

We are continually improving to keep pace with the changing requirements of our clients. We learn about the latest technologies and acquire new markets, keeping in mind the balance with the natural environment around us.

Our most significant value is our Team. The development of employees is crucial for us. We do our best to ensure optimal working conditions and an excellent atmosphere to inspire our Team and stimulate their creativity.

Our strategic goal is to become the most valued supplier in the European market, as well as the extension of our operating areas. We strive to achieve this goal through activities in the following fields:

Commercial

- *Offering standard and customized products*
- *Ensuring competitive prices*
- *Flexible approach to our clients in terms of planning orders and their fulfillment*
- *Cooperation with the best producers and following trends on the markets*
- *Ensuring technical support for our clients*
- *Participation in the professional events and exchanging the experiences*

Development

- *Development of our R&D department*
- *Improving the competences of our employees*
- *Ensuring the development of specialists in their fields*
- *Optimizing and improving our work*

Ethical

- *Compliance with the rules of professional ethics – both in business and internal relations*
- *Taking care of the environment*
- *Compliance with applicable law*
